

Appl. No. 10/075,326  
Attorney Docket No. CM2502  
Amendment dated January 28, 2004  
Response to First Office Action of September 29, 2004  
Customer No. 27752

**AMENDMENTS TO THE SPECIFICATION**

Please amend the specification as follows:

Please add the following new paragraph after the paragraph beginning at page 2, line 25:

--Figure 5a is a cross section view of the container, comprising a false bottom.--

Please amend the paragraph beginning at page 5, line 29, through page 6, line 3 as follows:

--In a preferred embodiment, the container comprises a substrate-dispensing aid which facilitates the removal of a substrate from the container. Said substrate-dispensing aid, may include an inclined bottom wall. The bottom wall itself may be inclined from the front to the back of the container. Alternatively, the bottom wall may be substantially horizontal, but the container comprises a ~~second~~-false bottom wall on the inside of the container which is inclined from the front to the back of the container. In either instance, substrates when stacked on the inclined surface will naturally tend to slide down the inclined surface toward the front of the box and the uppermost edge of the substrate will tend to pivot forward toward the dispensing opening of the container (see Figure 5a). In this embodiment it is preferred that the inclined surface, where present, is made from plastic.--
